**RE: Job Application - Learnership: Boilermaker**

I am excited to express my interest in this **Learnership Programme** which I found advertised on Google. In addition to Matric, I have also completed my N1 - N6 Mechanical Engineering technical certificate at TVET College, Durban Campus, and would like very much to take part in this opportunity, to lead me to becoming a qualified Artisan.

I have astute attention to detail that is required as a Boilermaker and through theoretical and practical experience gained during my studies, I have learned to work well in a team, to meet tight deadlines as well as delivery exceptional quality in workmanship, gaining experience working under pressure.

As a recruitment agency advertising this position, I see the job advertisement does not mention the company at where I would be working if successfully appointed, but I would like to take this opportunity to say that I offer a good mechanical aptitude and really enjoy casting and shaping metal pieces, paying attention to quality always.

Thank you very much for your time and attention. Please reach out to me on the mobile number provided when you are available to arrange an interview. I look forward to hearing from you soon.

Sincerely,

Name Surname
